Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest level of those boundaries. ¹ A "—" following a place name indicates that the place is also a fax MCD; In 1980, the census-of-vessels population of ships at sea was allocated to census tracts with a "99" suffix. An anchor symbol appeared on the 1990 maps locating a census-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the top. ² In 1970, the census used block numbers instead of the block numbering system seen today. ³ Following a block number indicates that the block number is repeated several times in the block.
